

SM-FT-3000 Banding Tool

Operation, Parts & Safety Manual
Original Instructions

Index

Tooling

Depending on set up, this tool is designed to assemble:

- Smart® Tie 20mm (¾")
- Smart® Tie 32mm (1¼")
- Smart® Band 19mm (¾") Hybrid & Compact
- Smart® Band 32mm (1¼") Hybrid & Compact systems.

Follow the instructions described to achieve safe operation.

Health & Safety - Warning & Safety Instructions

Read these instructions carefully:

Whilst Smart® Band and Smart® Tie are considered to be significantly safer than alternative metallic solutions, failure to follow these instructions can still result in personal injury.

General safety considerations:

1. STRAP BREAKAGE HAZARD

Smart® Band is free from sharp metallic edges however it is important to understand that improper operation of the tool or sharp corners on the load can result in strap breakage during tensioning that could result in the following:

- A sudden loss of balance causing you to fall
- Both tool and strap flying violently towards your face

Failure to place the strap properly around the load, an unstable or shifted load, could result in a sudden loss of strap tension during tensioning. This could result in a sudden loss of balance causing you to fall.

Positioning yourself in-line with the strap during tensioning, can result in personal injury from flying strap or tool. When tensioning, position yourself to one side of the strap and keep all bystanders away.

2. STRAP TENSION HAZARD

Smart® Band tools create very high tensions. Ensure body parts cannot be trapped during installation to prevent a crush injury.

3. EYE INJURY HAZARD

Failure to wear safety glasses with side shields can result in eye injury or blindness. Always wear safety glasses with side shields which conform to ANSI Standard Z87.1 or EN 166.

4. CUT HAZARD

Although the Smart® Band is not metallic and therefore significantly less likely to cause cuts to hands or fingers, it is still strongly recommended that the operator wear protective gloves.

5. NOISE HAZARD

When using the tool, ear protection must be worn.

At the operator's position:

- A-weighted sound pressure level, LpA = 80dBA (uncertainty, KpA = 4 dBA)
- A-weighted sound power level, LWA = 91 dBA (uncertainty, KWA = 4 dBA)
- Vibration level is less than 2.5 ms⁻².

6. TOOL CARE (for further information see Maintenance section)

- Always use an FRL (Filter, Regulator, Lubricator) Unit
- Inspect and clean the tool daily. Replace all worn or broken parts
- Lubricate all moving parts approximately every 5000 fitting cycles
- On air powered tools always disconnect the pneumatic connection to the tool when performing part removal and replacement procedures. NEVER connect a pneumatic source to a disassembled tool unless otherwise specified
- If used in a marine environment, wash off with fresh water after use, allow to dry then spray with light oil and wipe down.
- To avoid tool damage in prolonged use, set the tool up on a counter-balance.
- Never put away a wet or damp tool.

TOOL WEIGHTS

Smart® Band 19mm (¾") & Smart® Tie 20mm (¾") tools

- **8.3kg**

Smart® Band 32mm (1¼")

- **7.5kg**

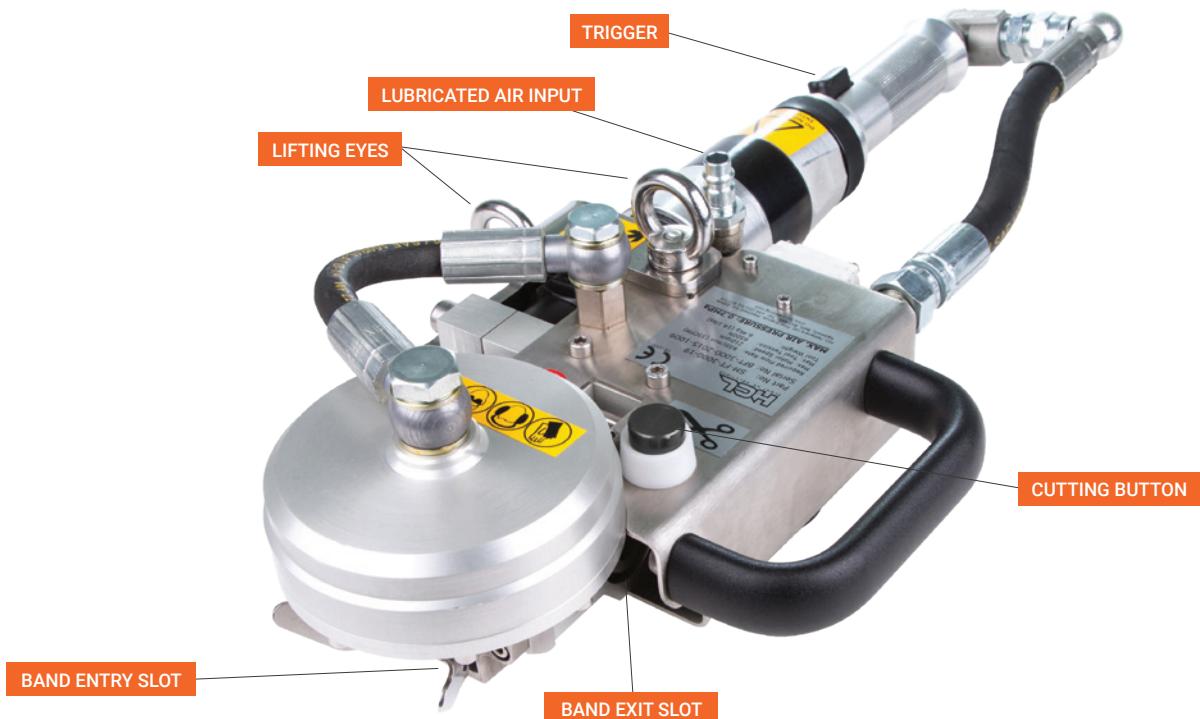

Smart® Tie 32mm (1¼")

- **9.1kg**

7. WORK AREA

Keep work areas uncluttered and well lit. For prolonged use and to avoid unnecessary strain on your back, set the tool up on a counter-balance.

1.1

Continuous Tightening Tool - Preparation

Air Preparation

To perform correctly, this pneumatic tool requires a continuous flow of clean, dry and lubricated air at a suitable pressure.

Air Flow

Air motors inevitably need high flow requirements and this should be taken into consideration before set up.

Smart® Band 19mm (¾") Hybrid & Compact and Smart® Tie 20mm (¾") tools – Requires a continuous air flow of 935 l/min (33 CFM).

Note: A pneumatic supply hose with internal bore of at least 10mm (¾") must be used to allow an adequate volume of compressed air to supply the tool.

Smart® Band 32mm (1¼") Hybrid & Compact and Smart® Tie 32mm (1¼") tools – Requires a continuous air flow of 1,000 l/min (35 CFM).

Note: A pneumatic supply hose with internal bore of at least 10mm (¾") must be used to allow an adequate volume of compressed air to supply the tool.

IMPORTANT – THE TOOL WILL NOT OPERATE TO SPECIFICATION UNLESS THE MINIMUM AIRFLOW AND AIR REGULATION REQUIREMENTS HAVE BEEN MET.

Air Filter

For best results, use a 50 micron filter or better.

Pressure Regulator

A pressure regulator is essential for controlling the performance of the tool and should be mounted as close to the tool as possible, preferably within 5m (15ft). The maximum allowable static pressure (tool not running) for the tool is 0.7 MPa (7.0 bar). The recommended pressures (see section 2.2) are given as Dynamic pressures (when the tool is running).

Air Lubricator

IMPORTANT – Risk of seizure if not adhered to.

The tool should be lubricated with 6 to 8 drops of oil per minute of continuous use, in order to maintain the life of the air motor and prevent seizing. Lubricators should always be mounted as close to the tool as possible, preferably within 3m (10ft). Always mount the lubricator at least as high, or preferably higher than the tool. HCL recommend allowing 100ml/1000 strap fittings

FOR MORE INFORMATION REFER TO THE PNEUMATIC NUTRUNNER TOOL MANUAL

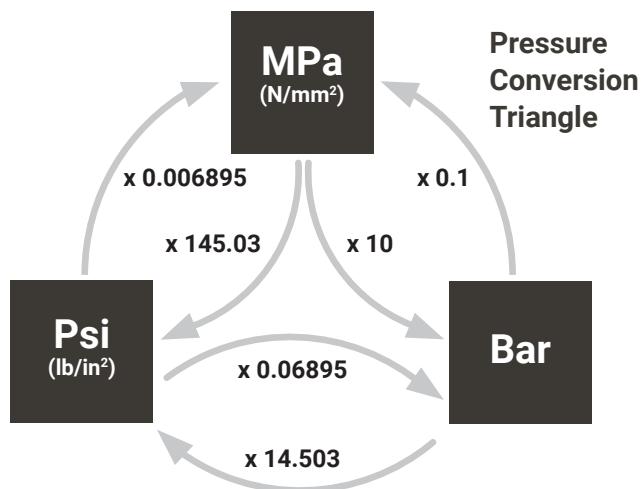

2.1

All tools are supplied with a 5m supply hose.

Continuous Tightening Tool - Tensioning

32mm and 19mm Hybrid Buckle

Recommended Pressure Settings

WARNING – Do not exceed the maximum pressure settings recommended for the system being applied

Smart® Tie		Diameter	Max Speed	Dynamic Pressure ¹	Max System Force (During Tightening)			Min Retention Force ² (After Tightening)		
Size	Material	mm			N	kgf	lbf	N	kgf	lbf
20mm (¾")	PA66 (Nylon 6.6)	100	310 rpm	0.60	3800	388	854	1800	184	405

	PA12 (Nylon 12)			0.55	6000	612	1349	2000	204	450
	PPS (Polyphenylene Sulphide)			0.55	5500	561	1236	2000	204	450
	PK (Polyketone)			0.65	7000	714	1574	2000	204	450

Smart® Band Hybrid * and Compact		Diameter	Max Speed	Dynamic Pressure ¹	Max System Force (During Tightening)			Min Retention Force ² (After Tightening)		
Size	Material	mm			MPa	N	kgf	lbf	N	kgf
19mm (¾")	PA66 (Nylon 6.6)	600	143 rpm	0.45	6000	612	1349	3500	357	787
	PA12GF (Nylon 12 Glass-filled)			0.60	7000	714	1574	3500	357	787
	POM (Acetal)			0.60	6500	663	1461	3500	357	787
	PPS (Polyphenylene Sulphide)			0.60	7000	714	1574	3500	357	787
32mm (1¼")	PA66 (Nylon 6.6)		210 rpm	0.55	16500	1683	3709	13500	1377	3035
	PA12GF (Nylon 12 Glass-filled)			0.55	16500	1683	3709	9000	918	2023
	POM (Acetal)			0.45	12500	1275	2810	7500	765	1686
	PPS (Polyphenylene Sulphide)			0.55	16500	1683	3709	9000	918	2023

Important Notes:

- 1) Dynamic pressure means that the input pressure is set when the tool is running. The static pressure (when the tool is NOT running) will be higher than the dynamic pressure. The input pressure may need to be reduced depending on the aggressive nature of the application.
- 2) The final retention force has been measured on a 600mm diameter steel pipe for Smart® Band and a 200mm diameter steel pipe for Smart® Ties.
This figure may be lower for smaller diameters, or higher for larger diameters.

Continuous Tightening Tool - Operation

1

Insert band into fixed end of the buckle*

*Does not apply to Smart® Band Compact

2

Pull back band to engage latch and push latch down onto band*

*Does not apply to Smart® Band Compact

WARNING – Ensure latch is fully engaged with band before tightening. Latch not fully engaged could lead to premature failure of system when tightening

3

Wrap band around the application

4

Insert band into other end of buckle

2.3

Continuous Tightening Tool - Operation

5

Pull band tight by hand, making sure teeth are fully engaged with band

6

SM-FT-3000-32 tool with trigger operation shown for reference. All other tool variants have a button to operate the tool

Insert tool onto band, whilst holding down trigger – The tool will tighten the band and then stall

Keep trigger / button held down
SM-FT-3000-32 Shown for reference (Trigger)

WARNING – To avoid trapping of fingers, keep both hands on the tool while the strap is being tightened

7

Keep trigger / button held down
SM-FT-3000-32 Shown for reference (Trigger)

Press the cutting button for 2 seconds or until the blade has completely cut through the band

8

Keep trigger / button held down
SM-FT-3000-32 Shown for reference (Trigger)

Once the band is cut, release the Cutting Button – The tool will eject the excess length of band

Smart® Band assembly complete

2.3

Maintenance - Servicing - Gripping Wheel & Blade

WARNING – Never service the tool whilst connected to a pressurised air line

1

Remove any blockages from Gripping wheel teeth.

To access all of the teeth, connect air line and press trigger to rotate Gripping wheel – **ensure that the air line is removed before clearing any blockages.**

2

Remove the M5 Capscrews (2x) and the Band guide.

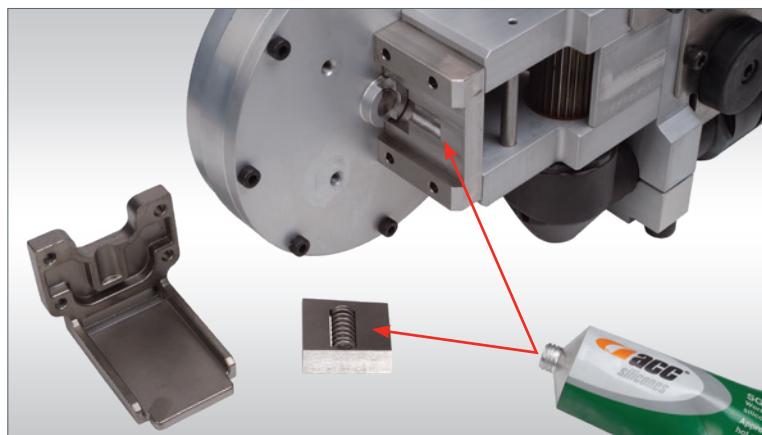

3

Remove the M4 Capscrews (4x) and the Blade housing.

4

Remove, clean and grease the Blade housing, Blade and Blade spring.

Reassemble tool as reverse of disassembly

3.1

Maintenance - Servicing - Cutting Piston

WARNING – Never service the tool whilst connected to a pressurised air line

5

Remove the Banjo bolt and hose from the top of the Cutting piston.

6

Remove the M4 Capscrews (7x) and the Cutting cylinder.

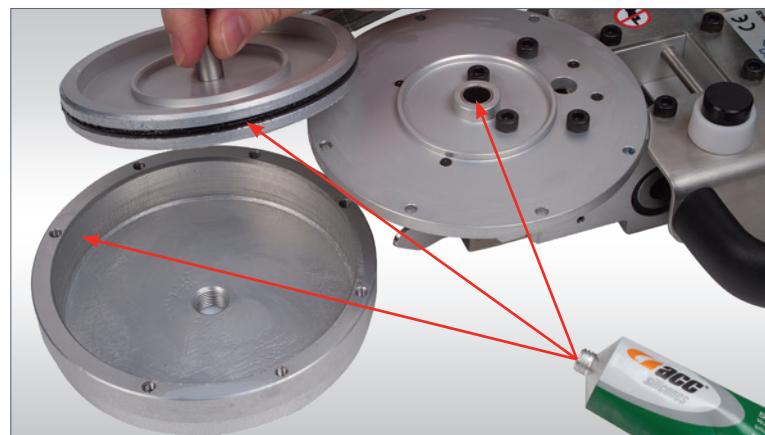

7

Remove the Piston assembly from the Cutting cylinder.

8

Clean and grease the Cutting piston, Piston shaft and DU bearing.

Reassemble tool as reverse of disassembly

For maintenance of Pneumatic Nutrunner,
please refer to manufacturers manual

Maintenance - Parts List - SM-FT-3000-32ST

3.2

Maintenance - Troubleshooting

Symptom 1: Smart® Band or Smart® Tie failure during fitting

Failure Mode & Possible Cause	Solution
1. Band/Buckle breaks due to incorrect input pressure	Set correct input pressure (Refer to Section 2.3, Tensioning Table)
2. Buckle breaks due to incorrect tool positioning during fitting	Ensure tool is correctly positioned in buckle. Do not lift tool away from application during tightening (Refer to Section 2.2, step 6)
3. Band breaks due to repeated relaxing and re-tightening	Only tighten the band once
4. Band pulls out of fixed end of buckle	Ensure that latch is fully engaged with band before tensioning (Refer to Section 2.2, step 2)
5. Buckle breaks due to being positioned in mid-air or around too small a radius	Position Buckle on suitable radius (Refer to Banding Products Technical Booklet; Section 2.2 Technical – Installation Design), or reduce pressure to an acceptable level
6. Band breaks due to being positioned around too small a radius	Position Band on suitable radius (Refer to Banding Products Technical Booklet; Section 2.2 Technical – Installation Design)

Symptom 2: Inadequate Smart® Band or Smart® Tie tension

Possible Cause	Solution
1. Input pressure incorrect	Check supply pressure. Set regulator to correct pressure.
2. Tool requires servicing	Service fitting tool (Refer to Section 3.1, Servicing)
3. Incorrect supply hose diameter	Use supply hose of at least 10mm (3/8") for 19mm version or 13mm (1/2") for 32mm version
4. No lubrication in FRL unit	Add appropriate lubricant or fit lubricator unit
5. Regulator at limit of travel	Insufficient supply pressure. Increase

Symptom 3: Tool does not grip Smart® Band or Smart® Tie

Possible Cause	Solution
1. Excess band tail from buckle too short	Remove band and replace with a longer length
2. Gripping wheel teeth dirty or clogged	Clean Gripping wheel teeth (Refer to Section 3.1, Servicing)

Symptom 4: Smart® Band or Smart® Tie does not feed through tool

Possible Cause	Solution
1. Blockage in tool, e.g. band	Remove Blade housing then clear blockage (Refer to Section 3.1, Servicing)
2. Blade stuck down	Remove, clean and grease the Blade housing, Blade and Blade spring. Remove, clean and grease Cutting Piston if required (Refer to Section 3.1, Servicing)

Symptom 5: Tool does not cut

Possible Cause	Solution
1. Blockage in tool, e.g. band	Remove Blade housing then clear blockage (Refer to Section 3.1, Servicing)
2. Blade worn or damaged	Replace or re-sharpen blade (Refer to Section 3.1, Servicing)
3. Incorrect input pressure	Set correct input pressure (Refer to Section 2.3, Tensioning Table)
4. Incorrect supply hose diameter	Use supply hose of at least 10mm (3/8") for 19mm version or 13mm (1/2") for 32mm version
5. No lubrication in FRL unit	Add appropriate lubricant or fit lubricator unit
6. Regulator at limit of travel	Insufficient supply pressure. Increase

CE Marking - EC Declaration of Conformity

EC Declaration of Conformity In accordance with EN ISO 17050-1-2004

Document reference
No. CE-1000

Name of manufacturer: HCL Fasteners Ltd

Address of manufacturer: First Avenue, Westfield Industrial Estate, Radstock, Bath, BA3 4BS, UK

Telephone: +44 (0)1761 417714

Email: sales@hcl-clamping.co.uk

We hereby declare that the following machinery is in conformity with the Machinery Directive 2006/42/EC:

Machinery description: Banding Tool

Part No: SM-FT-3000-

20ST: Smart® Tie Tool 20mm (¾")
32ST: Smart® Tie Tool 32mm (1¼")
19: Smart® Band 19mm Hybrid & Compact (¾")
32: Smart® Band 32mm Hybrid & Compact (1¼")

Serial No:

BFT-3000- -
↓ ↓
Year of manufacture **Consecutive number**

Applied Harmonised Standards:

Ref. No.	Title	Edition
BS EN 12100	Safety of machinery. General principles for design. Risk assessment and risk reduction	2010
BS EN ISO 4414	Pneumatic fluid power. General rules and safety requirements for systems and their components	2010

I hereby declare that the equipment named above has been designed to comply with the relevant sections of the above referenced specifications and is in accordance with the requirements of the Directive.

Name:

David Coles

Position:

Managing Director

Address:

First Avenue, Westfield Industrial Estate, Radstock, Bath, BA3 4BS, UK

Date:

1st January 2015

The technical documentation for the machinery is available from the above address.

4.1

Your attention is drawn to the following:

HCL warrants that a new HCL banding tool will operate per functional specifications for a period of sixty (60) days after the date of shipment to the owners place of business. Normal wearing parts, as outlined in the Operations, Parts & Safety manual, are also covered by a sixty (60) day warranty unless, in HCL's judgement, these parts have been subjected to abnormal or extreme usage. HCL's sole liability hereunder will be to repair or replace, without charge, F.O.B. HCL, Bath UK, any tool which proves to not operate per functional specifications within the stated period. HCL reserves the right to replace any tool which proves not to operate per functional specifications with a new or like-new tool of the same model, if in HCL's judgement such replacement is appropriate. Any new replacement or like new replacement tool provided to an owner will carry a full sixty (60) day warranty. Any warranty repaired tool will carry a warranty for the balance of time remaining on the initial sixty (60) day warranty. This warranty will be extended to compensate for the time the tool is in HCL's possession for warranty repairs.

This warranty is void as to any tool which has been:

- a) subjected to mis-use, misapplication, accident damage, or repaired with other than genuine HCL replacement parts.
- b) improperly maintained, or adjusted, or damaged in transit or handling.
- c) used with improperly filtered, regulated, unlubricated air.
- d) in HCL's opinion, altered in a way that affects or detracts from the performance of the tool.

HCL MAKES NO WARRANTY, EXPRESSED OR IMPLIED, RELATING TO MERCHANTABILITY, FITNESS OR OTHERWISE EXCEPT AS STATED ABOVE AND HCL'S LIABILITY AS ASSUMED ABOVE IS IN LIEU OF ALL OTHERS ARISING OUT OF OR IN CONNECTION WITH THE USE AND PERFORMANCE OF THE TOOL. IT IS EXPRESSLY UNDERSTOOD THAT HCL SHALL IN NO EVENT BE LIABLE FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES WHICH MAY ARISE FROM LOSS OF ANTICIPATED PROFITS OR PRODUCTION, SPOILAGE OF MATERIALS, INCREASED COSTS OF OPERATION OR OTHERWISE.

Considerable effort has been made to ensure that this product conforms to our high quality standards. However, should you experience any difficulties, please contact your Sales representative providing samples and the serial code specified on the tool.
